

**ASSISTIVE ERGONOMIC DESKTOP SYSTEM
AND MODULAR COMPONENTS****ABSTRACT OF THE DISCLOSURE**

The assistive desktops and modules disclosed are for use as an occupational therapy product, educational assistive tool, corrective and supportive handwriting assistive tool and ergonomic aid. They provide ergonomic positional, postural and functional support for the tasks of writing, reading or manipulation of materials typically used on a flat, horizontal surface during normal classroom, office and home office activities. This support is provided without obstruction of view of the environment or other materials and provides additional support of reference materials. They are intended to be portable; provide secure or mobile placement; and adjust to accommodate a variety of users and needs, including normal and learning/physically challenged individuals. They are intended to be used by individuals with conditions such as learning and/or physical disabilities; postural conditions such as osteoporosis, arthritis or chronic pain; as well as those desiring a more comfortable, ergonomic work surface.
